

I am requesting that you reject NAB's petition 04-160. There is an obvious conflict of interest on NAB's part. If they are afraid of competition, then they should try to compete fairly in the free market place by offering more products and services. They should not be using the power of the government to stifle competition. I listen to traditional radio and satellite radio. Satellite radio offers something different and a broad range of programming. The FCC has made many enemies recently and should not be pandering to special interest groups and lobbyists. If I were XM Satellite Radio Inc., then I would encourage the United States Justice Department look into anti-trust violations by NAB and the FCC's participation in their effort to undermine our capitalist system. Please reject NAB's petition 04-160.
